Title	Crash course geography. What does the atmosphere do.
Publisher	Place of publication not identified : Crash Course Geography, 2021.
Format	1 online resource (11 minutes) video file
Notes	Title from resource description page (viewed April 14, 2022).
Contributor	Crash Course Geography, publisher. ›
Subject	Atmosphere › Earth (Planet) › Educational films › Geography -- Study and teaching › Greenhouse effect, Atmospheric › Mesosphere. › Short films › Stratosphere. › Thermosphere. › Troposphere. ›
Description	Much like a cell membrane, our atmosphere forms a protective boundary between outer space and the biosphere that allows for all life to exist on Earth's surface. Today, we're going to talk about its composition and layers (the troposphere, stratosphere, mesosphere, and thermosphere), follow the path of a sunbeam of light as it travels through space and (potentially) reaches Earth's surface, and discuss how the greenhouse effect can be both a good and bad thing!
Language	English
Language note	In English.
Other title	What does the atmosphere do
Type	Video
Creation Date	2021
Identifier	OCLC : (OCoLC)1317278567
